Available in  
consumer &  
Bulk pack

2kg/5kg/50kg

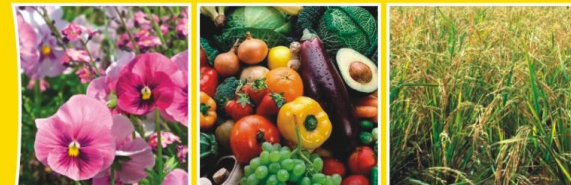

\* FCO - The Fertiliser Control Order (FCO) is a stringent Ministry of Agriculture Quality Standard.

## Harbinger of the second green revolution

EcoSmart Home Garden Organic Soil Enricher is FCO - Compliant organic compost rich in humus & organic carbon that can be used in agricultural and horticultural applications.

Our clients range from landscapers to potted-plant owners. We service our bulk clients from our large capacity of over 300TPD with 11 plants spread around India. While for the domestic users we have created an eco-friendly, premium & consistent quality product in 2kg/5kg/50kg pack sizes.

EcoSmart Organic Soil Enricher is manufactured through a scientific aerobic composting process which reduces emission of Green House Gases.

**1kg of Organic Soil Enricher reduces more than 2kg of CO<sub>2</sub>**

### Benefits

- Rich in humus & organic carbon derived from recycled organic matter
- Improves soil structure enabling higher water holding capacity
- Stimulates the growth of beneficial micro-organisms
- Moderates the pH level of acidic/alkaline soils
